Hazardous Weather

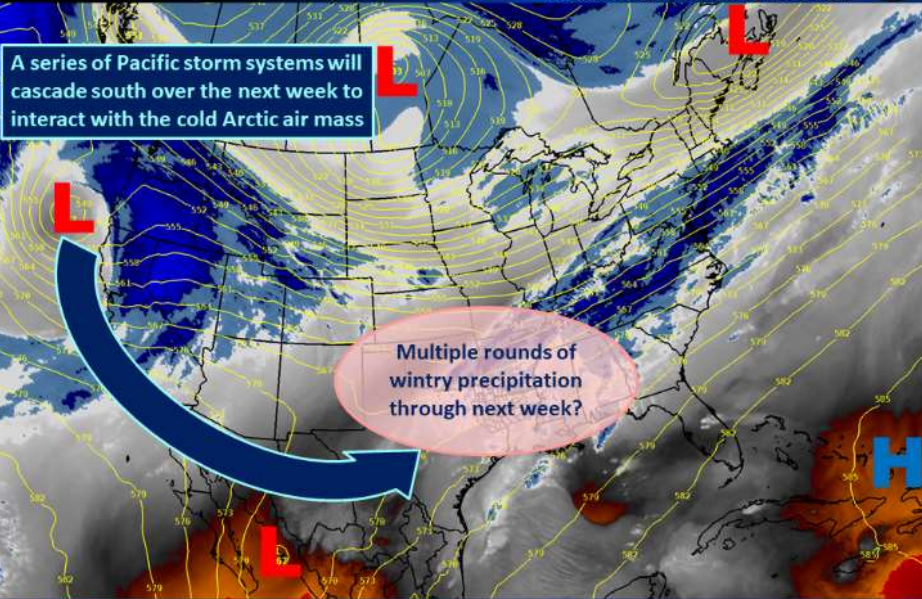

Hazardous Weather

Significant Winter Weather Ahead...

Weather Forecast Office
Shreveport, LA

Issued February 11, 2021 7:42 PM CT

f NWSShreveport

weather.gov/shv

The threat of multiple rounds of wintry precipitation appears more likely as we move through this weekend into much of next week. A series of major Pacific storm systems will advance southeast over the coming days and interact with an Arctic air mass already in place across our region. This will offer multiple opportunities to see a mix of wintry precipitation to include freezing rain, sleet, and snow. Impacts over this weekend should be mostly minor compared to more significant impacts that appear likely next week with well below freezing temperatures expected.

Winter Weather Advisory Tonight-Friday AM

Weather Forecast Office
Shreveport, LA

Issued Feb 11, 2021 4:27 PM CST

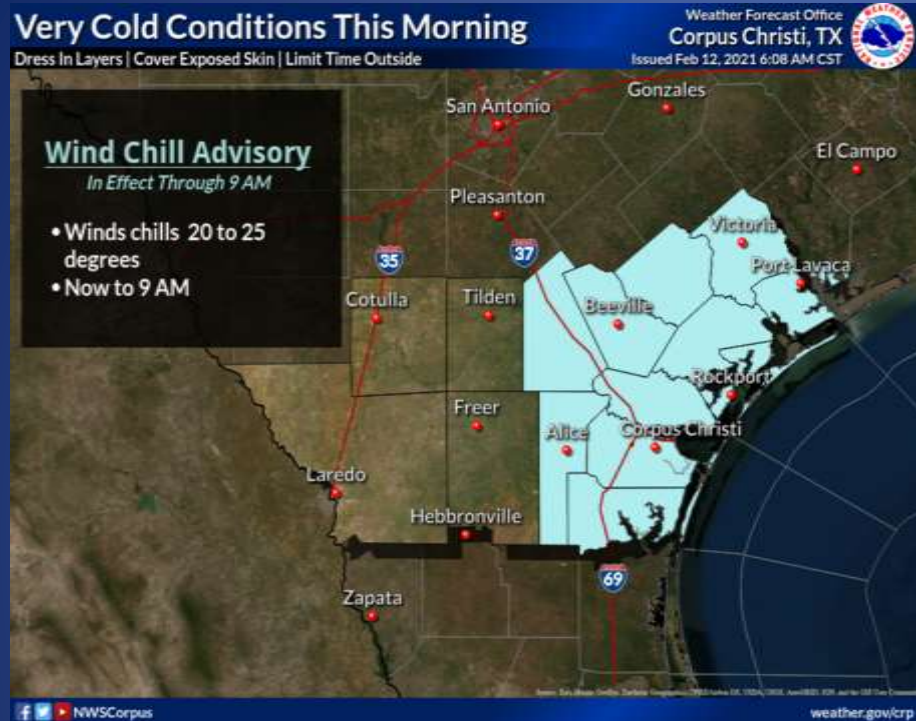

f NWSShreveport

weather.gov/shv

A Winter Weather Advisory is in effect for portions of the region through noon Friday due the threat of light icing on elevated surfaces like bridges and overpasses. Freezing rain or drizzle will be possible with temperatures near or below freezing through Friday morning.

Hazardous Weather

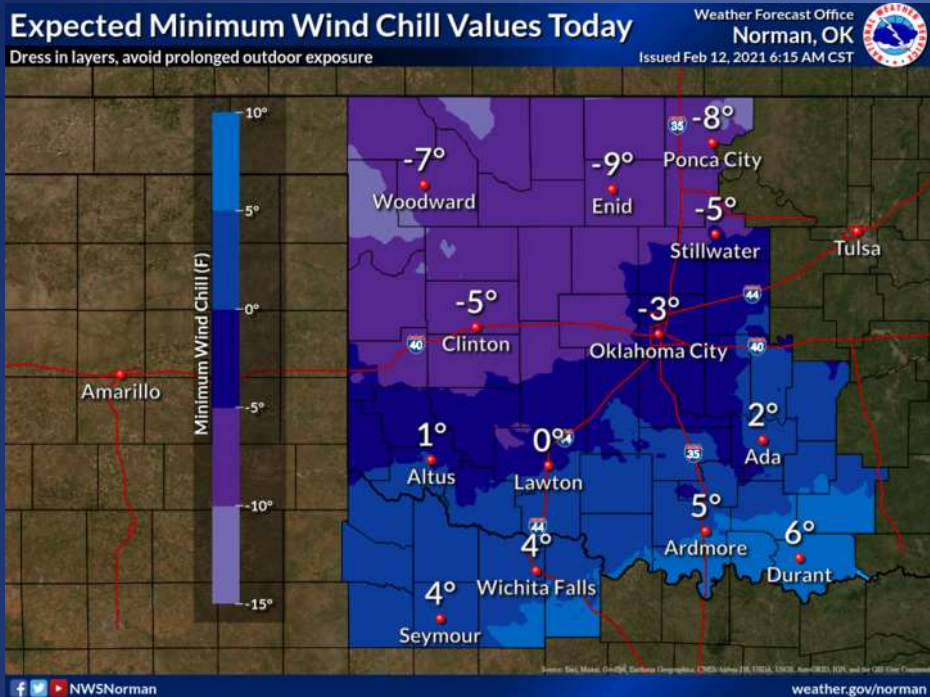

This morning we are experiencing very cold conditions. With temperatures in the 30s and windy conditions our wind chills this morning are around 20 to 25 degrees. Bundle up and stay warm!

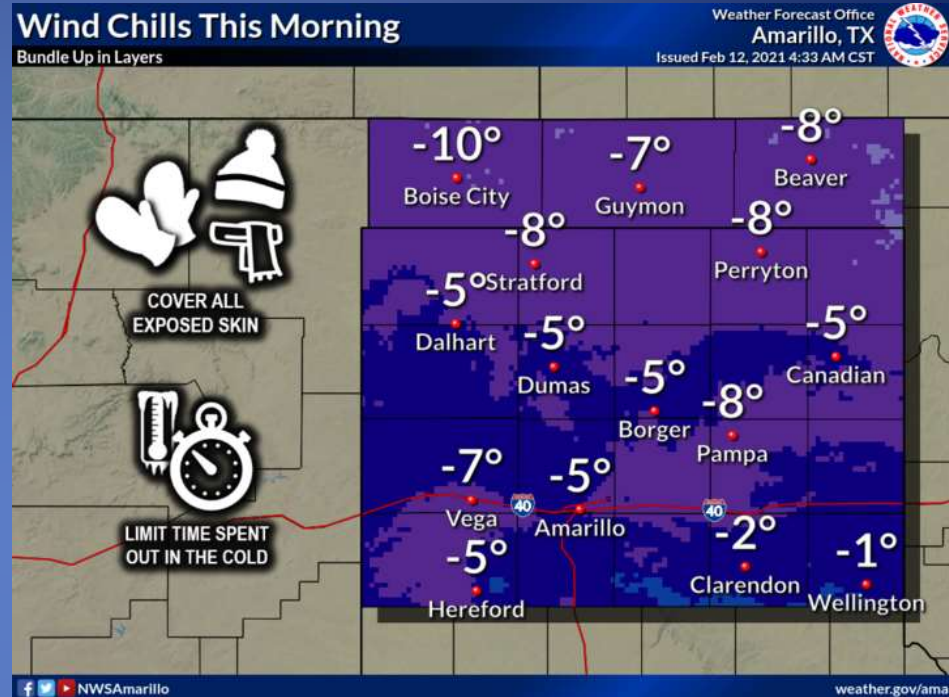

Today (Friday) will be cloudy and cold with high temperatures ranging from the upper 20s to the mid 30s and wind chills in the teens and 20s. Some light freezing drizzle will be possible across the southeast this morning, but additional ice accumulations are not expected. Since many locations across North and Central Texas will remain below freezing for much of the day, slick spots could still exist, especially on bridges and overpasses. Drivers are urged to use caution when traveling today.

Hazardous Weather

Gusty north winds will create very low wind chill values.

While the coldest wind chills are expected Sunday through Tuesday, wind chills this morning are below zero. A Wind Chill Advisory has been issued for all but the southern TX Panhandle until 11 AM. The OK Panhandle and the northeastern TX Panhandle will see a Wind Chill Advisory continue until noon on Saturday. Limit time outdoors and dress in layers to prevent frost bite and hypothermia. Don't forget to protect pets.

Hazardous Weather

Winter Weather Advisory

In effect until Noon CST

Weather Forecast Office
Lubbock, TX
Issued Feb 12, 2021 3:47 AM CST

Freezing Drizzle and Freezing Fog continues

Traveling hazardous. Take it slow!

Winter Weather Advisory

In effect until 12 PM CST/11 AM MST Today.

Weather Forecast Office
Midland/Odessa, TX
Issued February 12, 2021 4:37 AM CT

Winter Weather Advisory across...Lea County, the Permian Basin, and Trans Pecos region.

Icy Conditions...

- Freezing drizzle and freezing fog will create a light glaze of ice on exposed surfaces

Impacts...

- Bridges and overpasses as well as normal roadways will likely become slick and hazardous for travelers
- Expect very slippery sidewalks and walkways

Preparedness Actions...

- Prepare for winter driving conditions by reducing speeds and allow for longer stopping distances

NWSMidland

weather.gov/maf

Light freezing drizzle and freezing fog continues across the region. Expect hazardous driving conditions through the morning and give yourself plenty of extra time if you must travel.

Freezing fog/drizzle will create a light glaze of ice on exposed surfaces including roads and sidewalks. Drivers should exercise caution and reduce speeds.

Hazardous Weather

Winter Weather Advisory

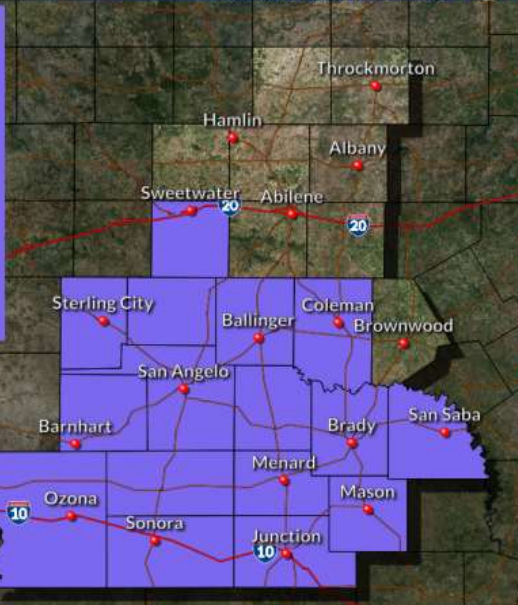

Through Mid-Morning

Weather Forecast Office
San Angelo, TX
Issued Feb 12, 2021 12:22 AM CST

Areas of Freezing Drizzle will continue across portions of West Central Texas through mid morning.

Precipitation will be light, but with temperatures below freezing, icy spots on area roadways are again likely.

f t y NWSSanAngelo

weather.gov/sjt

Freezing drizzle will develop again through mid morning. Icy spots on area roadways are likely.

Another Cold Day

Afternoon "Highs"

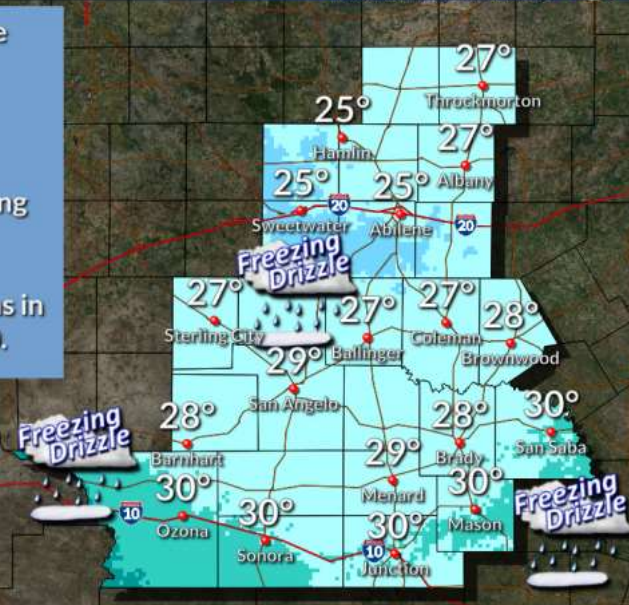

Weather Forecast Office
San Angelo, TX
Issued Feb 12, 2021 1:57 AM CST

Patchy freezing drizzle ending early in the morning

Another day with temperatures remaining below freezing.

Cloudy skies with highs in the mid 20s to near 30.

f t y NWSSanAngelo

weather.gov/sjt

Mostly cloudy and cold again today with highs in the mid 20s to near 30 degrees. Patchy freezing drizzle will end in the morning.

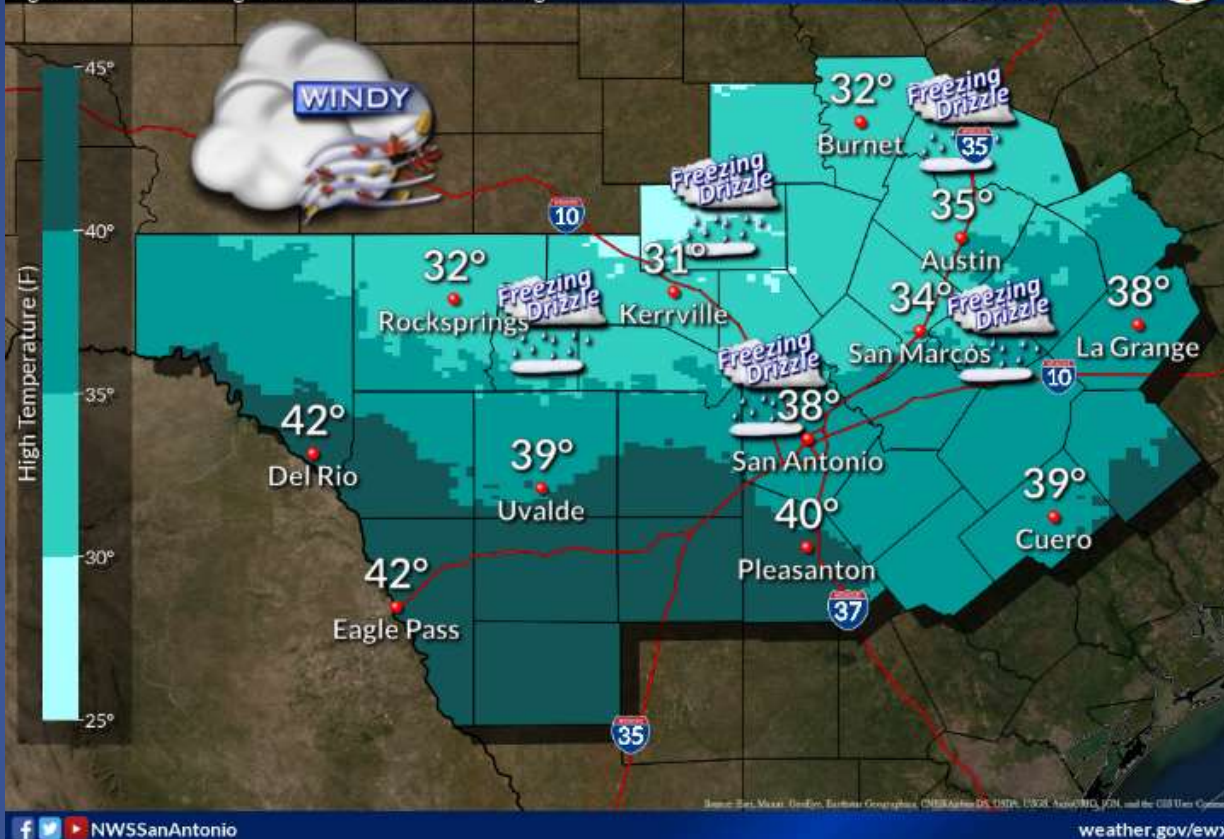

Hazardous Weather

Today: Cold and Blustery

Light drizzle and freezing drizzle to end later this morning

Weather Forecast Office
Austin/San Antonio, TX

Issued Feb 12, 2021 6:47 AM CST

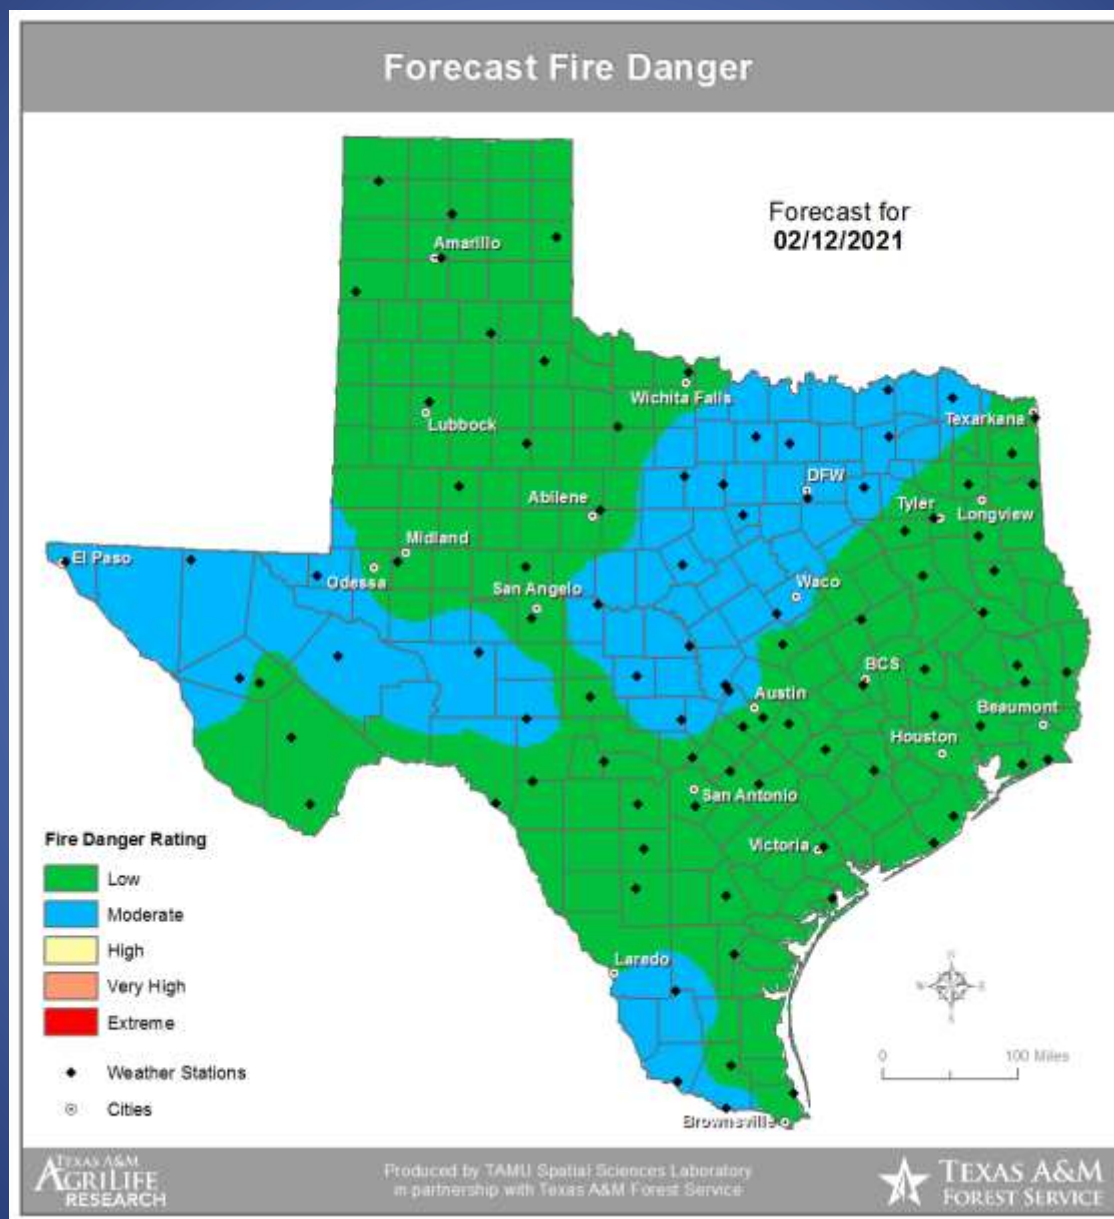

Another cold and blustery day today. Patchy drizzle and freezing drizzle is forecast to come to an end later this morning. High temperatures will range from the low 30s to low 40s.
